Journal

An electronic journal is a journal in which students express their thoughts and opinions about a chosen topic such as sports, daily life, and dreams. I am a student of Mrs. Raycraft/Blessing reporting on a new activity, the electronic journal. In a recent study that has been conducted, it shows that children who keep a journal are more advanced in reading than children who don't keep a journal. I trust that this statement can impact many lives of children. It may improve test scores, and improve social skills by letting children express their emotions so that they don't have to keep them bottled up inside.

Learning Experience in Computers

I am hoping to reach out and explain the many benefits of taking Mrs. Raycraft/Blessing's computer class. Not only do you learn how to type, but also in addition you learn skills such as the correct format is to type a paragraph, and much more. Through the duration of this class you develop skills, which can be

applied to everyday life. I hope to become fluent in typing by the end of the class and be accurate when punching in the keys. In addition to typing the Five Themes of Geography was reinforced by integration of Social Studies into Computer class.

Learning.com

Learning.com is an excellent learning experience, which teaches people of all ages to learn the fundamentals of a computer. Learning.Com is an easy to use program consisting of various animated lessons. This program is an interactive learning experience. When you learn on this web site, it will help people tremendously when they go do tasks on a computer. In addition to learning the fundamentals on the computer it teaches you how to be grammatically correct. Throughout the duration of this program you will dramatically improve your typing skills, grammar, and knowledge. I believe that learning.com can help people all around the world.

Micro-Type Pro

Micro-Type Pro is a program that consists of various learning programs in which students learn how to type consistently and fluently. I am a student of Mrs. Raycraft/ Blessing's computer class reporting on a program known as Micro-Type Pro. Due to this computer program I have increased my speed by more than fifty percent. I believe that if I keep on using this program, I will be able to reach my goal of sixty words per minute. This program can alter children's typing skills. It can make children's speed and accuracy shoot up. This program can impact the lives of all children, from Pre-K to high school.
