

## **Applied Learning with Learning.com**

Today's students need 21st Century Skills to compete in a world that is not only technology driven but requires higher order thinking and digital literacy.

They need to be able to use technology to explore, acquire knowledge, analyze and evaluate information, test ideas, and draw conclusions. They need to think critically and creatively, navigate the digital world safely, and learn by doing.

Learning.com provides students with these real-world learning experiences through applied learning opportunities to help students build deep content understanding, raise academic achievement, and encourage student motivation to learn. When our curriculum materials are used to teach students, we provide opportunities for students to connect past learning to present learning.

While the benefits of using project-based learning are well known, many educators are not sure where to start. EasyTech provides direct instruction in 12 digital literacy skills, and applied learning options integrate those skills into core subject areas.

Specifically through Projects and Inquiry students can make relevant connections and practice what they're learning.
