

Learning.com Tech Quest

What is Tech Quest? Tech Quest is a Learning.com feature that delivers essential technology skills to students without teachers needing to manage classes. It's magic. Every student that has a Learning.com account, is automatically assigned Tech Quest. Students just need to log in to their Learning.com account at login.learning.com, Clever or Classlink.

What will my students see when they log in?

Upon logging in, students will select an avatar. They will see a pathway of auto-scored, student-led curriculum designed specifically for their grade level. Students click on the first step and move along the path. A visit to the Arcade provides access to keyboarding, mouse skills games, and coding activities.

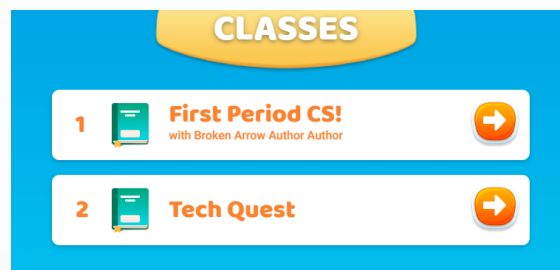

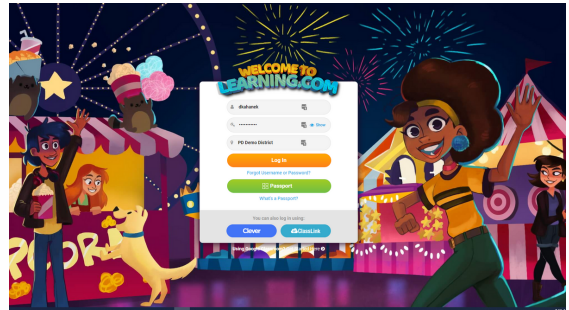

What topics are covered in Tech Quest? All of the essentials students need to be successful digital learners such as: Online Safety and Digital Citizenship, Keyboarding, IT Fundamentals, Business Applications, Computer Science, and Multimedia. **Note: The High School Tech Quest Sequence only addresses Keyboarding, Online Safety & Digital Citizenship, and Computer Science*

What if I have classes already set up?

No problem. Tech Quest will appear in the student's menu below other classes.

How can I monitor student progress?

In the Teacher Center, a Tech Quest Dashboard is available from the top menu bar. From here you can see individual scores and excuse assignments.

GRADEBOOK		STUDENTS										FAQ
Class	Notes	Online Safety & Digital Citizenship	Keyboarding	IT Fundamentals	Business Applications	Computer Science	Multimedia	Online Safety & Digital Citizenship	Keyboarding	IT Fundamentals	Business Applications	Computer Science
